RN - Kneron KL520 SDK v1.6.0

New Features

- provided flexible controls on image preprocessing operations, like bypass preprocess/cropping/scaling
- optimized built-in postprocess functions
- improved stability and speed performance

Changes

- returned more result status of inference core(NPU)
- added more preprocess normalization modes
- removed firmware for host_lib
- added firmware for Kneron PLUS (kdp2)

Bug Fixes

- fixed some bugs in examples
